Subject: microsoft settlement

In the interest of the U.S. economy, please do not let disgruntled competitors use the courts instead of competing in the marketplace. This so-called "browser war" is ancient history. It is hurting the stock market recovery and the u.s. taxpayer as well.

Microsoft is an engine of economic growth...which we are in desperate need of now...as we try to recover from not only the effects of the recession, but the tragedy of 9/11.

ENOUGH LITIGATION. LET'S MOVE ON!

Jeanne Drury
